Diversity

Diversity as a concept means the differences human beings have. Diversity goes beyond the human race and color. There are various dimensions through which diversity is expressed. They include;

- gender
- race
- ethnicity
- age

Some of these dimensions cannot be altered. Hence, individuals have to accept and learn how to cope with them. For example, gender, race and age cannot be changed. However, occupation and religious beliefs can be modified.

Social Structure

Social structures refer to particular patterns and arrangements that exist in the society. These patterns are as a result of human behavior and interactions that are recurring in the society. Social structures are governed by rules and regulations by

which the members should abide with. Therefore, the members are familiar with these laws and hence social life becomes predictable. There are agencies that have led to building of the social structures.

Socialization

Socialization is a lifetime process. It is gained through interacting with each other. During this process, we learn the social expectations and how to live with each other in the society. This interaction can occur in different set ups. For example in a family, learning institutions, peer groups and social media.
